Julian David Betancourt Cuervo

Lead QA Automation Engineer | QA Subject Matter Expert (SME)
Bogotá, Colombia | +57 300 – 682 2639 | carramplancha@gmail.com
[https://www.linkedin.com/in/julian-betancourt-cuervo-a05820ab/] | ISTQB Foundation Level Certified | AWS Certified AI Practitioner

Professional Profile

Seasoned Lead QA Automation Engineer and Architect with over 11 years of experience in the software testing industry. Specializing in designing, implementing, and scaling robust automation frameworks using **Playwright**, **Cypress**, and **Selenium** within JavaScript, TypeScript, and Java ecosystems.
Proven track record (4+ years in leadership) of defining QA strategies for high-growth environments, leading Center of Excellence (CoE) initiatives, and integrating AI-driven testing solutions. Expert in E2E and API testing for complex distributed systems, microservices, and secure platforms. Highly adaptable leader focused on fostering collaboration, technical mentorship, and delivering high-ROI automation suites.

Core Expertise

- **Automation Leadership:** Strategy Development, QA Governance, Mentorship, CI/CD Integration.
- **Advanced Frameworks:** Playwright (Expert), Cypress, Selenium WebDriver, Appium, WebdriverIO.
- **Programming:** TypeScript (Advanced), JavaScript (Advanced), Java, Ruby, Python.
- **Testing Types:** API Testing (REST/Microservices), E2E, Performance, Mobile (OTT/Roku), Security awareness.
- **Methodologies:** BDD (Cucumber/Gherkin), Shift-Left Testing, Agile (Scrum/Kanban), TDD.

Professional Experience

QA TechLab CoE Lead - QA Subject Matter Expert (SME)
LeanTech | Remote | **March 2024 – February 2026**

- **Playwright Standardization:** Established **Playwright** as the primary enterprise-wide standard for all E2E and API automation projects, replacing legacy tools to improve execution speed and reliability by 40%.
- **Strategic Leadership:** Leading the QA Center of Excellence (CoE), defining the roadmap for quality standards across multiple client-facing product teams.
- **Advanced API Automation:** Architected a specialized API testing layer using Playwright to validate microservices and distributed systems, ensuring high data integrity and security.
- **AI-Driven Innovation:** Pioneered the integration of **Playwright MCP (Model Context Protocol)** to leverage AI in test generation and self-healing scripts, reducing maintenance overhead by 30%.

- **Framework Architecture:** Implemented advanced Page Object Model (POM) and Screenplay patterns in TypeScript, ensuring maintainability and scalability for large-scale enterprise suites.
- **Auth0 & Identity Validation:** Architected an automated API testing layer in Playwright to validate Auth0 identity management, ensuring secure OAuth 2.0/OIDC token exchanges and role-based access control (RBAC) across distributed microservices.
- **Security-First Automation:** Integrated automated API security testing into CI/CD pipelines, focusing on token expiration, signature validation, and unauthorized redirect URI prevention.
- **Technical Community Building:** Founded "QA Forums" to share automation best practices, broadening the company's technical maturity and training junior/mid-level engineers.
- **Tech Stack:** Playwright, TypeScript, Node.js, AI/LLM Tools, Jenkins, AWS, GitHub Actions.

Test System Specialist
AMADEUS | Bogotá, Colombia **| August 2023 – March 2024**

- **Critical Systems QA:** Acted as the SME for main Inventory and Flight Systems (UCS), ensuring high reliability for global airline clients.
- **Automation Maintenance:** Developed and debugged test scripts for complex backend systems and performed deep log investigations for root cause analysis of system failures.
- **Client Collaboration:** Served as the primary technical contact for airline clients to enhance system testability and resolve escalated tickets in the backlog.
- **SaaS Reliability:** Performed deep-log investigations for SaaS-based airline integrations, acting as the SME for authentication failures and data synchronization issues within global Inventory and Flight Systems (UCS).

QA Automation Engineer
Zemoga | Bogotá, Colombia **| December 2020 – August 2023**

- **Lead for OTT Platforms:** Part of the QA team for the DirecTV Roku native application, managing end-to-end planning, resource allocation, and automation strategy.
- **Playwright Migration:** Spearheaded the transition from a legacy Node.js solution to Playwright for E2E testing of critical streaming flows, significantly improving the stability of CI/CD pipelines.
- **Hybrid Framework Management:** Maintained and optimized UI and Backend (BE) automation frameworks using Selenium with Java and Node.js for the Morningstar financial project.
- **SSO & Session Persistence:** Engineered the E2E testing strategy for Single Sign-On (SSO) within the DirecTV Roku ecosystem, validating session persistence and seamless user authentication across integrated streaming platforms.
- **Process Optimization:** Implemented "Shift-Left" testing and BDD (Cucumber) solutions to detect defects earlier in the SDLC, reducing technical debt for financial data platforms.
- **Stakeholder Management:** Conducted high-level technical demos for client Product Owners (POs), providing transparency on automation ROI and quality metrics.
- **Tech Stack:** Playwright (Migration), JavaScript, TypeScript, Selenium, Java, Cucumber, Roku/OTT Tech, Node.js.

Senior Test Automation Engineer
CSG International | Bogotá, Colombia | **February 2020 – October 2020**

- **Strategy Design:** Designed the overall testing strategy for a complex backend system serving three global clients under a unified Journey Orchestration architecture.
- **Cypress Architecture:** Built and maintained a Cypress (TypeScript/JS) framework from scratch for E2E Client UI testing, achieving 90% regression coverage.
- **Cloud Testing:** Led the implementation of Cucumber in a JavaScript framework specifically for testing AWS-hosted services and microservices.
- **Enterprise Integrations:** Validated complex backend enterprise integrations for high-scale Journey Orchestration, ensuring data integrity between UI clients and AWS-hosted RESTful microservices.
- **Tech Stack:** TypeScript, JavaScript, Cypress, Cucumber, AWS, Jira.

QA Analyst M2
HUGE INC | Bogotá, Colombia | **September 2018 – February 2020**

- **High-End Client Delivery:** Managed QA for premium brands (Revlon, ExxonMobil, Hublot), focusing on functional, UI, and cross-browser testing for responsive sites.
- **Tech Stack:** JavaScript, Selenium, Jenkins, BrowserStack.

Senior Quality Assurance Engineer
IT CROWD ARG (Remote) | Bogotá / Argentina | **May 2018 – September 2018**

- **Framework Development:** Developed a mobile/UI automation framework using **Ruby, Appium, and Selenium** following TDD principles.

Senior Functional & Automation QA
PRODIGIOUS BRAND LOGISTICS | Bogotá, Colombia | **June 2015 – April 2018**

- **Features Lead:** Led QA for the HELIOS Alliance (Renault, Nissan), managing Test Plans and automated regression suites using **Ruby and Selenium**.

Technical & Soft Skills

Category	Skills & Technologies
Primary Automation	**Playwright (SME),** Cypress, Selenium, Appium (Mobile SSO), WebdriverIO
Programming Languages	**TypeScript (4+ years), JavaScript (5+ years),** Java, Ruby, Python
API & Backend	**REST, Auth0, OAuth 2.0, SAML, SSO,** Microservices, Postman, SQL
DevOps & Cloud	AWS (Certified AI Practitioner), Jenkins, Git, GitHub Actions, Docker
Tools & Management	**iPaaS & CRM integrations,** Jira, TestRail, BDD/Gherkin
Soft Skills	Strategic Leadership, Mentorship, Stakeholder Management, Problem Solving
Languages	**English: Fluent (Professional)**

Education & Certifications

- **ISTQB® Certified Tester** – Foundation Level (iSQI)
- **AWS Certified AI Practitioner**
- **Academic High School Diploma** | Colegio de Bachillerato Universidad Libre (2005)
